

From research to product

The interface between research and commercial market enjoys particular attention in Jena. It was early realized here that the **systematic interlocking** of both areas is the best insurance for successful transfers.

Consultation in all areas

Those striving to **transform scientific results or new technologies into marketable products** or performances will find competent contacts in Jena. Consultations range from legal issues and market analysis to marketing and subsidies. Depending on the research area and business objective, there are many opportunities to choose from. Consultations are available for scientists, students, enterprises, research and development institutions, universities, associations and organizations as well as further institutions.
